Q15 Educate, promote and incentivize the use of advanced technologies in our homes. Canadians are amongst the world’s largest consumers of Energy on a per capita basis. Our cold winters are undoubtedly the reason behind this, however, technology has come a long way to help us lower our energy use. High efficiency windows, furnaces and air conditioners, heat pumps, the use of solar and wind power, energy efficient lighting, coupled with stricter building codes can lower greenhouse gasses and reduce the impact on climate change. Home owners should be encouraged to conduct a home energy audit to identify areas of concern. New builds should adhere to higher Energy Star guidelines.
